

LEED NC	LEED O&M	LEED Schools	Points	LEED Category	Comments
SUSTAINABLE SITES					
6.1	6	6.1	1 - 2	Storm Water Design and Quantity Control	EnduroSolv Products can be used in programs using storm water runoff for Cooling Tower Makeup
	3		1	Integrated Pest Management	Use of EnduroSolv Biocides in a properly administered microbial control program
WATER EFFICIENCY					
Prerequisite 1			Required	Water Use Reduction	EnduroSolv products can help to use water more efficiently in towers and boilers
3		3	2 - 4	Water Use Reduction	EnduroSolv products can help to use water more efficiently by innovative use of wastewater (e.g. use of AC condensate)
	4		1 - 2	Cooling Tower Water Management Non Potable water source for tower makeup	EnduroSolv can help to increase the efficient use of water and innovative use on non-potable water
ENERGY AND ATMOSPHERE					
Prerequisite 2			Required	Minimum Energy Performance	Energy efficiency can be maximized in HVAC systems using EnduroSolv's state of the art treatment products and programs
1	1	1	1 - 10	Optimize Energy Performance	
2	4	2	1	On Site Renewable Energy	EnduroSolv boiler treatment products can be utilized to improve the protection and efficiency of water heat boilers reducing the need for fossil fuels
	3.1		1	Performance Measurement –Building Automation	EnduroSolv Partners can monitor cooling tower or boiler system parameters on or off site, and /or can be interfaced with building automation system
	3.2		1 - 2	Performance Measurement	EnduroSolv Partners can optimize and measure the chiller and boiler efficiencies through on site energy evaluations and system modification recommendations.

MATERIALS AND RESOURCES					
	Prerequisite 1		Required	Sustainable Purchasing Policy	EnduroSolv Products are manufactured to Standards earning the EPA's Green Chemistry Award
	7		1	Solid Waste Management	EnduroSolv products are designed to be used 100% in the designated operating system. Packaging is manufactured using post consumer waste and is recyclable
INDOOR ENVIRONMENTAL QUALITY					
5	3.5	5		Indoor Chemical and Pollutant Source Control	EnduroSolv solid products do not emit harmful vapors sometimes associated with liquid chemical products
INNOVATION IN DESIGN AND OPERATION					
1	1	1	1	Innovation in Design and Operations	EnduroSolv products and programs are truly unique in improving operator safety, reducing waste while providing maximum energy and water savings. EnduroSolv programs also help to reduce carbon footprint. For every case of solids delivered approximately 2.6 gallons of fuel are saved compared to delivery in 55 gallon drums.
REGIONAL PRIORITY					
1	1	1	1	Regional Priority	EnduroSolv Partners work with building designers and owners to address regional issues such as regional water quality, droughts, and water shortages to minimize the use of water for heating and cooling.
